Introduction

Inno Food Tier List allows users to create and store tier lists of their favorite foods. Users can create custom tier lists from predefined templates. The application also includes a database of food items, with description and price. Also the application has an API integration for intriguing fact every day.

Quality & Testing

Maintainability ✓

Performance ✓

Reliability ✓

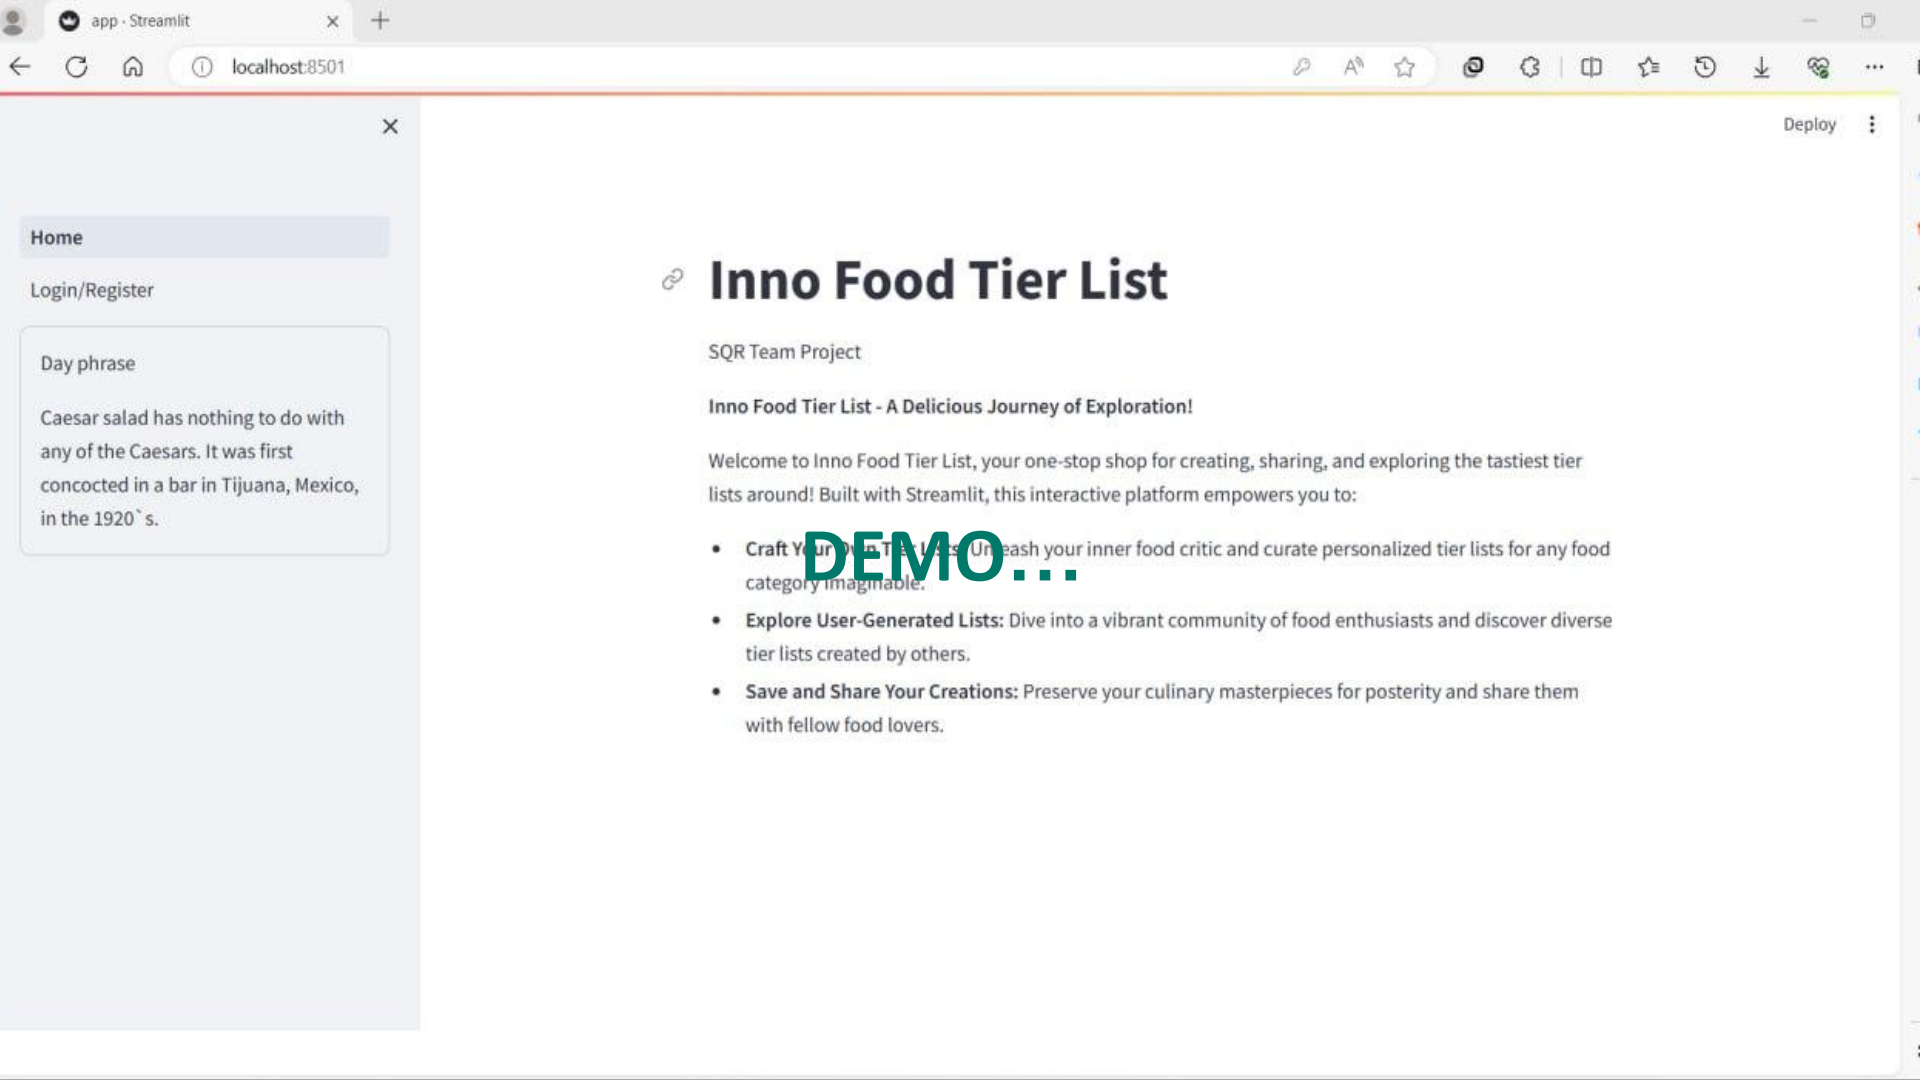

Security ✓

Вся жизнь - тестирование,
только ты в нем вечный джун,
и никогда неизвестно какой из
сценариев позитивный, а какой
- негативный.

Contribution

- Vladimir K. - authorisation methods, database structure, Github actions, unit tests
- Vladimir Z. - external API, classes of entities, poetry installation, unit tests
- Pavel - methods for Template, script for sample data, integration tests
- Arlan - full Front-end development and design, frontend tests

Day phrase

Caesar salad has nothing to do with any of the Caesars. It was first concocted in a bar in Tijuana, Mexico, in the 1920`s.
